## Document History

Date	Description
May 8, 2014	Revised 6.12.4.6 Fixed list with issue number correction Removed 6.12.4.1 New list issue AIR-20560
May 7, 2014	Removed 6.12.4 Improvements list issue AIR-20002
April 17, 2014	Release 6.12.4.6
April 2, 2014	Release 6.12.4.5
March 31, 2014	Release 6.12.4.4
March 21, 2014	Release 6.12.4.2
March 17, 2014	Release 6.12.4.1
February 25, 2014	Release 6.12.4
January 9, 2014	Updated with <a href="#">known issue</a>
December 18, 2013	Release 6.12.3.1
October 15, 2013	Important Note Regarding DevicePack and Export Feature
October 9, 2013	Release 6.12.2.1
October 7, 2013	Release 6.12.2
August 15, 2013	Release 6.12.1
June 24, 2013	Release 6.12.0.1
June 18, 2013	Change to directory in <a href="#">Known Issue AIR-16867</a>
June 12, 2013	Release 6.12

## Release 6.12.4.6

(Not generally released)

New	
<b>AIR-22037</b>	<p>Access the Web Client with username, password, and a live video of a specific camera ID using URL variables as follows:</p> <p>http://[SERVERNAME]:50000/Default.aspx?U=jsmith&amp;P=FIY1TQ==&amp;C=7&amp;R=1</p> <p>where:</p> <ul style="list-style-type: none"><li>• [SERVERNAME] is the Microsoft® Windows® Hostname or the IP address of the Aimetis Symphony Server</li><li>• U= is the <b>User Name</b></li><li>• P= is the <b>Encoded Password</b> (Generate the encoded password using the <b>Aimetis Password Encode Utility</b> located in <b>C:\Aimetis Symphony Install folder\_tools\PasswordEncoder.exe</b>)</li></ul>  <ul style="list-style-type: none"><li>• C= is the <b>Camera ID</b> to load</li><li>• R= prevents the server from load balancing the request by redirecting the request to another server. Not intended production deployments.</li></ul> <p><b>Note:</b> Ensure that each variable is separated by the ampersand symbol (&amp;)</p>

Fixed	
<b>AIR-21939</b>	Images are cleaned correctly

## Release 6.12.4.5

(Not generally released)

Improvements	
<b>AIR-21760</b>	Moroccan LPR module support improved
<b>AIR-21877</b>	Retrieving edge storage JPEG and historical video for multi-channel AXIS video encoders working correctly

Fixed	
<b>AIR-21832</b>	Occasional LPR crashes resolved
<b>AIR-21878</b>	Redundant storage works better in configurations with slower media

## Release 6.12.4.4

Includes previously unreleased 6.12.4.x patch release updates

Fixed	
<b>AIR-21823</b>	Alarm times correct and in sync with alarm images

## Release 6.12.4.3

(Not generally released)

Fixed	
<b>AIR-21716</b>	Scheduler working correctly
<b>AIR-21748</b>	ALPR working successfully in cases where motion detection chaining is disabled

## Release 6.12.4.2

(Not generally released)

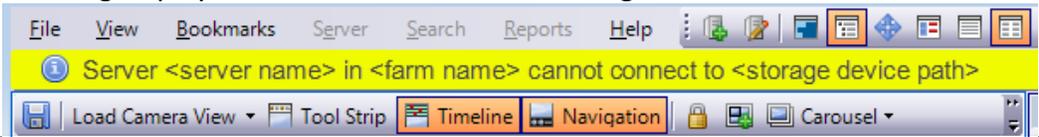

Fixed	
<b>AIR-21650</b>	Users can access historical data successfully
<b>AIR-21675</b>	Following storage restoration, correct time values recorded
<b>AIR-21624</b>	Footage maintained correctly to prevent recording gaps

## Release 6.12.4.1

(Not generally released)

Fixed	
AIR-21431	Rule actions working correctly with Access Control devices in Symphony

## Release 6.12.4

Improvements	
AIR-14974	Warning displayed in client when external storage device unavailable 
AIR-20396	2-Way Audio Support for Axis P8221
AIR-20666	Support for Cyrillic license plate recognition in LPR engine
AIR-20725	I/O devices merge correctly during server merge
AIR-20756	Improved SDK documentation
AIR-20852	SDK documentation now accessible from Windows Start Menu list of Aimetis Symphony programs list
AIR-20922	Auto detection timeout increased to accommodate slow networks

Fixed	
AIR-18830	VE180 analytic correctly detecting loitering action
AIR-20534	Axis: Symphony Client functioning correctly when zooming M3007 in quad view
AIR-20613	Symphony correctly detecting Bosch Autodome 7000 HD camera
AIR-20671	Symphony correctly receiving alarm from ADAM device
AIR-20693	Vivotek camera disconnects and reconnects successfully
AIR-20722	<b>Add server from another farm</b> feature working correctly
AIR-20724	Client runs successfully after adding server to farm
AIR-20732	VE180 configuration settings maintained correctly after upgrade
AIR-20735	Backup restore process successfully restoring VE180 settings from before upgrade
AIR-20736	PTZ Lock Message only appears when necessary
AIR-20741	VE130 analytic correctly detecting motion in Axis corridor mode with dual stream
AIR-20753	Footage file management improved for large scale systems
AIR-20760	Log types labeled correctly in View Detailed Logs
AIR-20764	ALPR working correctly in dual stream mode
AIR-20775	PT091 autotracking corrected for dewarped image
AIR-20776	Export to CSV working correctly
AIR-20778	Timing issue with PTZ camera resolved, eliminating false motion detection issue

Fixed	
AIR-20790	Direct connect working correctly with Axis cameras
AIR-20795	LPR installer completes correctly on Windows 2012 servers
AIR-20799	Large import of cameras successful
AIR-20800	Timeline working correctly for missed signals and disk full scenarios
AIR-20801	Restore backup feature working correctly
AIR-20802	Video wall switching working correctly
AIR-20803	Successfully regains database connection after shutdown
AIR-20804	Security profile switch messages correctly displayed when Clients restarted
AIR-20805	Active Directory Single Sign-On correctly adding user to Symphony
AIR-20806	Client runs successfully after Video Wall settings change
AIR-20808	<b>Manage Security</b> dialog box correctly displayed on monitor
AIR-20809	Correct permission message displayed for PTZ function
AIR-20810	Security profile correctly activated so that user does not appear in <b>Users Viewing Camera</b> list
AIR-20811	Videowall controller correctly connecting to videowall panels
AIR-20812	PTZ lock functionality working correctly for camera in Direct Connect mode
AIR-20813	Client runs successfully after maximizing/minimizing/closing/dragging videowall panels using videowall controller
AIR-20814	Symphony successfully saves changes in User Configuration
AIR-20815	PTZ lock/unlock working consistently
AIR-20816	
AIR-20817	Alarms for banned devices appear only when expected
AIR-20818	Access Denied correctly for user from live ban group logged into client machine and adding cameras with Support Direct Connect enabled
AIR-20825	New alarm entry in Alarm Log correctly added to log
AIR-20826	Axis encoders setup as expected when added to Symphony
AIR-20851	Resolution properly scaling to fit analytics resolution
AIR-20865	License correctly updated after adding camera
AIR-20872	<p>Rules can be configured so that after motion is detected on a camera, auto tracking can be triggered on a second camera.</p> <p>Note: When entering a time value in the rule (<i>force a PTZ camera to a location</i>), if auto-tracking is selected, then the label of the rule now reads: <b>Minimum seconds between activations of this rule</b>. The PTZ camera ignores rule-triggering events for this many seconds. This prevents the camera from going back to the target position if the rule triggers multiple times.</p>
AIR-20881	Vivotek fisheye camera video displayed successfully on multi-view restore
AIR-20883	Watchdog correctly restarting tracker when one of two streams on camera inaccessible
AIR-20886	Client successfully updates automatically
AIR-20983	Rule using fence activating alarm based on correct direction
AIR-20955	Users Viewing Camera feature working correctly with Supervisor login

Fixed	
AIR-21049	AXIS P8221 audio issues resolved
AIR-21056	Report counts correct for overhead people counting
AIR-21060	In Turkish OS, PTZ lock/unlock message working as expected
AIR-21061	Video Wall panel switching working correctly
AIR-21067	Live video continues successfully when client loading new user
AIR-21068	Clients upgrading correctly when servers are mixed versions
AIR-21069	Client running successfully when Quick Find launched
AIR-21138	Tracker working correctly
AIR-21171	Gaps no longer appearing in timeline
AIR-21179	RestartMediaGraph working successfully for restarted Axis camera
AIR-21183	PT091 works successfully with dual streams when used with either VE180 or VE150

## Release 6.12.3.3

(Not generally released)

Fixed	
AIR-21015	Access to historical video after upgrade successful
AIR-21021	NetSendHist no longer crashing
AIR-21043	Footage indexes correct
AIR-21045	PT091 working correctly

## Release 6.12.3.2

(Publically released in 6.12.4)

Fixed	
AIR-20938	<p>Auto-tracking correctly starts when trigger by fixed camera</p> <p>Note: When entering a time value in the rule (<i>force a PTZ camera to a location</i>), if auto-tracking is selected, then the label of the rule now reads: <b>Minimum seconds between activations of this rule</b>. The PTZ camera ignores rule-triggering events for this many seconds. This prevents the camera from going back to the target position if the rule triggers multiple times.</p>

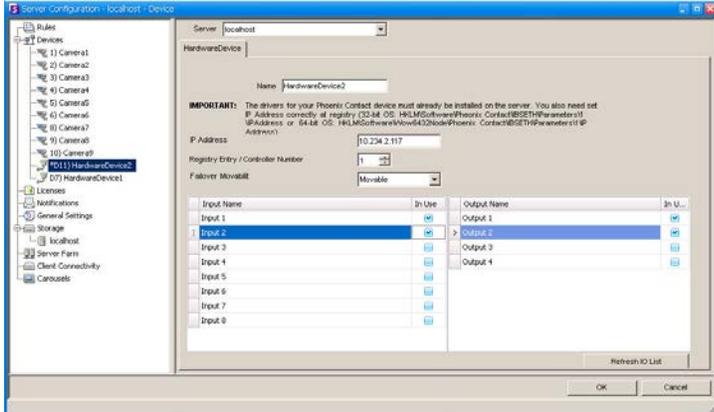

## Release 6.12.3.1

New	
AIR-5322	Notify user if server farm becomes disconnected
AIR-16632	Added ability for Symphony to stream RTSP
AIR-18103	Support for Siemens SPC intrusion system
AIR-19802	Online backup (only) now includes most recent one day's worth of server logs. Stored in a logs.zip file.
AIR-19951 and AIR-20182	Color detection analytics. See Analytics and Client User guides.

Improvements	
AIR-19430	Contour-based object tracking
AIR-20150	P2000 Integration
AIR-20251	" <b>Change Image</b> " option for <b>Maps</b> now documented in <i>Client User Guide</i>
AIR-20252	Symphony can connect with Gallagher server if Cardholder.FTItemID has a duplicate value
AIR-20358	VE180 analytic engine will take advantage of multiple CPU cores if available
AIR-20370	<b>Alarm Counts</b> report renamed to <b>Alarm Statistics</b> , and new report created called <b>Alarm Report</b> <ul style="list-style-type: none"> <li>• <b>Alarm Statistics</b> - Summary (for example, per hour) of total alarms and how many are real-actionable, real non-actionable, and false</li> <li>• <b>Alarm Report</b> - A report on each individual alarm</li> </ul>
AIR-20371	SDK Rule Configuration sample includes <b>Select Different Image</b> option in analytics
AIR-20523	VE180 and VE150 analytics now display the size/speed of an object. For calibrated cameras, size displayed in square meters and speed in meters per second. For uncalibrated cameras, size displayed in pixels/100 and speed is (pixels per second)/10. <a href="https://www.aimetis.com/Xnet/KB/KBArticleDetails.aspx?ID=10260">https://www.aimetis.com/Xnet/KB/KBArticleDetails.aspx?ID=10260</a>
AIR-20544	Better Taiwanese LPR support
AIR-20557	Default configuration values in <b>Advanced</b> settings of VE180 analytic revised
AIR-20607	Upgrade to TeamViewer v9
AIR-20685	Support for v3.0 LPR dongles

Fixed	
AIR-10793	ACTi: .aira video clip plays successfully in Symphony Player
AIR-15735 and AIR-19491	Tracking boxes in correct location on cameras with multiple streams
AIR-15930	Support for Chinese characters in <b>Alarm Comments</b>

<b>Fixed</b>	
<b>AIR-16831</b>	Joystick functioning properly after Client restart
<b>AIR-17025</b>	Live audio default setting successful when Client set to Chinese Traditional language
<b>AIR-17310</b>	Symphony Player successfully plays files with Chinese characters in filename
<b>AIR-18783</b>	Symphony AD authentication correctly synchronized in multi-server environment
<b>AIR-18918</b>	Symphony saves camera view layout filename properly by eliding unsupported symbols/characters
<b>AIR-19886</b>	<b>Add server from another farm</b> feature working correctly
<b>AIR-19909</b>	PTZ calibration successful on Samsung and Panasonic cameras
<b>AIR-20055</b>	ACTi audio input working correctly
<b>AIR-20081</b>	Video run back through Symphony successfully
<b>AIR-20092</b>	Video clip exported at 1FPS (.aira file) plays at correct speed
<b>AIR-20143</b>	Consistent video stream from Axis cameras
<b>AIR-20158</b>	Historical video plays at normal speed when using RTSP
<b>AIR-20160</b>	<b>Status</b> column updated correctly in <b>Server Farm</b> screen of <b>Server Configuration</b>
<b>AIR-20166</b>	Errors no longer generated in <b>Application Log</b> when multi-view closed
<b>AIR-20167</b>	VE180 does better job of tracking at low frame rates
<b>AIR-20181</b>	Thai LPR collation fixed
<b>AIR-20185</b>	Failover no longer occurs erroneously
<b>AIR-20188</b>	Images copied to file or clipboard have correct colors
<b>AIR-20189</b>	Web Client no longer prompts unnecessarily to install video plug-in
<b>AIR-20217</b>	Thai LPR plate confidence now logged
<b>AIR-20219</b>	Licenses no longer incorrectly allocated to non-camera devices
<b>AIR-20223</b>	AXIS M3007 + P8221 audio works
<b>AIR-20227</b>	Minimized de-warped quad view restored correctly
<b>AIR-20241</b>	Windows 8 layout issues resolved
<b>AIR-20242</b>	<b>Apply To All</b> button in the <b>Other</b> tab in <b>Camera View Settings</b> working consistently
<b>AIR-20249</b>	Wall mount camera panoramic views corrected
<b>AIR-20283</b>	Video decorations correctly displayed on webcam
<b>AIR-20296</b>	Lock UI functionality restored
<b>AIR-20297</b>	VE130 analytic able to find motion in small search areas
<b>AIR-20332</b>	Correct access maintained when panel switched to blank camera while device tree loading
<b>AIR-20338</b>	Clients authorized correctly after switching security profile
<b>AIR-20339</b>	Symphony <b>Messenger</b> supports Chinese characters
<b>AIR-20375</b>	Symphony Player installation process and launch successful
<b>AIR-20378</b>	Search works properly with VE180 analytic
<b>AIR-20495</b>	Adding cameras works faster
<b>AIR-20536</b>	Symphony successfully recording and emailing when alarm on motion rule triggered and camera set to <b>Never Record</b>

Fixed	
<b>AIR-20539</b>	Do not send blank alarm e-mail
<b>AIR-20555</b>	Calendar is correctly displayed in bold for the dates having footage and signal files available in \Video\_footagearchive
<b>AIR-20579</b>	Chinese characters displayed correctly in <b>User Information</b> dialog box, <b>Description</b> field
<b>AIR-20601</b>	Rules trigger correctly on Flir and Axis PTZ cameras
<b>AIR-20605</b>	Camera correctly defaults to record <b>Always</b> in case where analytic removed or analytic switched to a non-motion analytic
<b>AIR-20625</b>	Lost camera connection alarm working correctly
<b>AIR-20635</b>	Tracker marks timeline correctly when noting edge storage
<b>AIR-20296</b>	User can successfully lock UI ( <b>View&gt;Lock&gt;Lock UI</b> )
Known Issue	
<b>AIR-20725</b>	<p><b>Issue:</b> During a server farm merge, DIO devices fail to merge properly.</p> <p><b>Workaround:</b> After merging farms: Task 1: On the destination farm, delete the IO device manually.</p> <ol style="list-style-type: none"> <li><b>Server&gt;Configuration&gt; Server Configuration</b> dialog box.</li> <li>Right-click on <b>Devices</b> and delete the IO device.</li> </ol> <p>Task 2: On the destination farm, add the device again.</p> <ol style="list-style-type: none"> <li><b>Server&gt;Configuration&gt; Server Configuration</b> dialog box.</li> <li><b>New&gt;Add a Hardware Device&gt;</b> &lt;type of device&gt;. Add IP address, etc. The IO channels will be displayed.</li> </ol>
	

## Important: DevicePack and Export Feature

Symphony Release 6.12.2.x requires Device Pack 1.0.10.0 for Export to work.

Symphony 6.11.x (prior to 6.11.3) and 6.12.x releases earlier than 6.12.2 require device packs prior to 1.0.10.0 in order for export functionality to work.

Symphony Release	DevicePack Release Required	Export Functioning
6.12.2.x	1.0.10.0	Yes
6.12.1 and earlier	1.0.9.x and earlier	Yes
6.11.2 and earlier	1.0.9.x and earlier	Yes

### Release 6.12.2.1

Fixed	
AIR-20199	InfoService correctly starts NetSendHist
AIR-20215	Thailand plate descriptions functioning correctly in Aimetis License Plate Recognition (ALPR)

### Release 6.12.2

Contains Device Pack 1.0.10.0 and Spanish and French Help.

New	
AIR-19437	Generic de-warping functionality in Symphony, support for ENEO 5MP fisheye model. See <a href="https://www.aimetis.com/Xnet/KB/KBArticleView.aspx?ID=10250">https://www.aimetis.com/Xnet/KB/KBArticleView.aspx?ID=10250</a>
AIR-18947	Generic de-warping functionality in Symphony, support for Axis M3007. See <a href="https://www.aimetis.com/Xnet/KB/KBArticleView.aspx?ID=10250">https://www.aimetis.com/Xnet/KB/KBArticleView.aspx?ID=10250</a>
AIR-19942	JCI: support for metadata reception. Device Pack 1.0.9.0 or later is required for this functionality. See <a href="#">User Guides &amp; Release Notes</a>

Improvements	
AIR-19473	SDK: instructions and sample code provided for How to wrap OCX into a DLL and use in an MFC Application.
AIR-19474	Reports: <b>Totals</b> added to <b>Object Crossing Line</b> report
AIR-19581	Improved accuracy in PT091

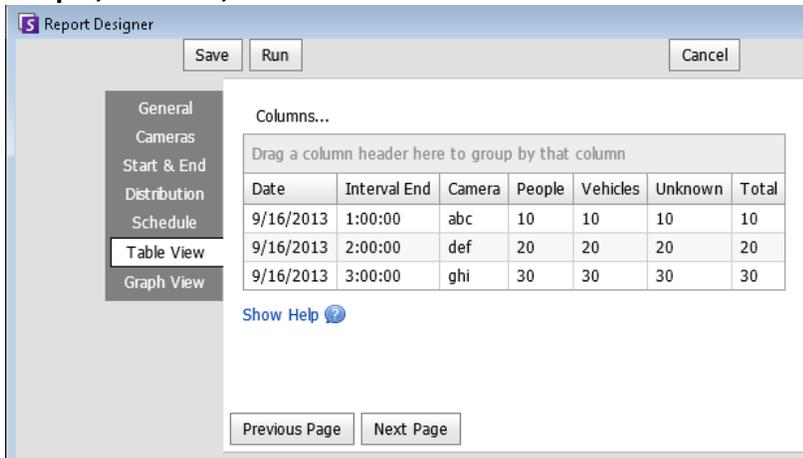

## Improvements

**AIR-19583**

Reports: New column includes object class

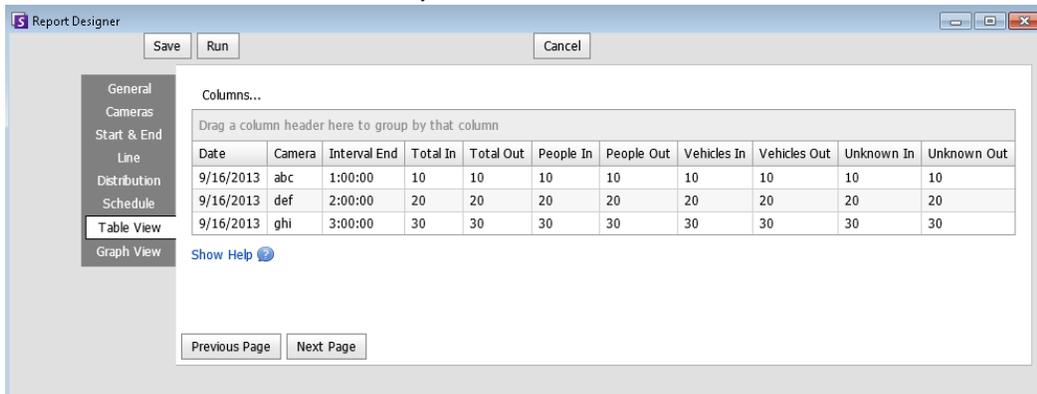

New Columns for **Object Counts** Report:

**People, Vehicles, Unknown**

New Columns for **Object Counts Across a Line** Report:

**People In, People Out, Vehicles In, Vehicles Out, Unknown In, Unknown Out,**  
Count In -> Renamed to **Total In**, Count Out -> Renamed to **Total Out**

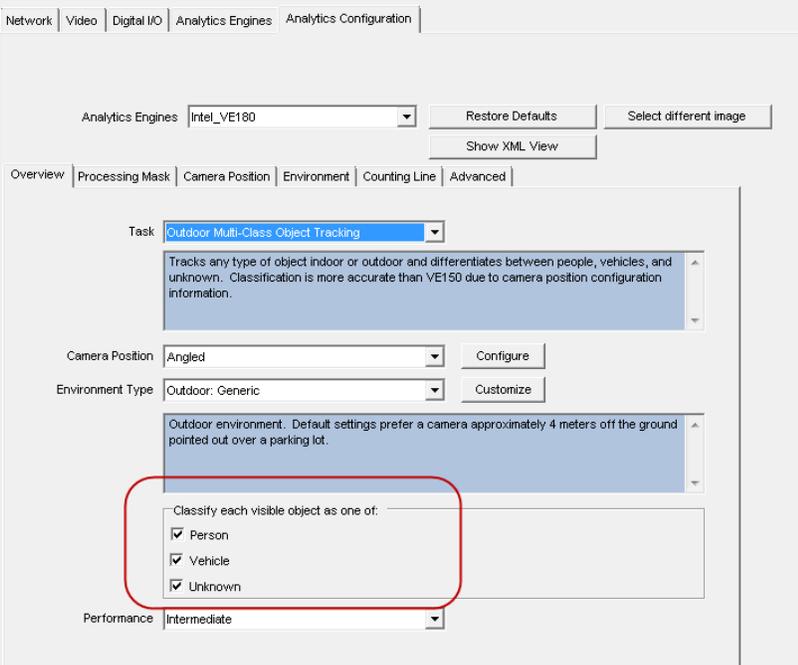

**AIR-19587**

Storage and cleaner performance improved

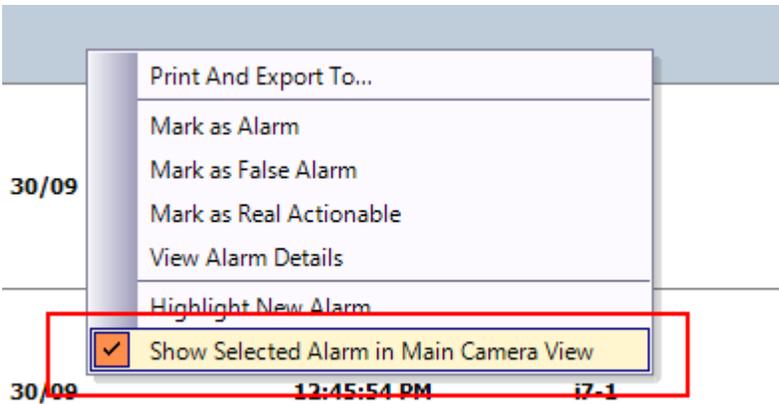

**AIR-19907**

NAS storage performance improved

Improvements	
<b>AIR-19939</b>	<p>VE180 – Analytics Configuration - <b>Overview</b> tab: Object Categories to Detect changed to “Classify each visible object as one of:” Person, Vehicle, Unknown</p> 
<b>AIR-19945</b>	<p>Improvements to DevicePack deployment  Also new important message in KB article:  <a href="https://www.aimetis.com/Xnet/KB/KBArticleView.aspx?ID=10165">https://www.aimetis.com/Xnet/KB/KBArticleView.aspx?ID=10165</a></p> <p>When you install Symphony server, the <b>_updates</b> folder contains ONLY the Client Updates installer, not the DevicePack installer. Hence it CANNOT push DevicePack updates to clients.</p> <ul style="list-style-type: none"> <li>• If the client is a different version, it will push a CLIENT update which effectively updates the client's device pack.</li> <li>• If the client is the SAME version, it should have the same DevicePack version; hence no update is required. This means that if the client's DevicePack has been updated (or downgraded), the server will not automatically downgrade (or upgrade) it because it cannot.</li> </ul> <p><b>Workaround:</b> If you install the SAME DevicePack on the Server, it will put the DevicePack client installer into the <b>_updates</b> folder and have no other real impact on the server. This will cause clients to update.</p>
<b>AIR-20004, AIR-20005</b>	<p>Various improvements resulting in customer benefits such as:</p> <ul style="list-style-type: none"> <li>• a slow disk will not result in missing footage</li> <li>• less expensive/slower storage (NAS/DAS/SAN/Local) can now work better with Symphony</li> </ul>
<b>AIR-20031</b>	<p>SDK installer now includes C++ runtime components</p>
<b>AIR-20061</b>	<p>Enhancements to Jacques IP intercom integration</p>

Improvements	
AIR-20101	Aira2Mpeg utility uses existing encoding when exporting to .avi or when converting .aira to other formats resulting in faster exporting/conversion and without compression artifacts

Fixed	
AIR-19447	<b>InfoService</b> restart correctly no longer triggers failovers
AIR-19452	<b>Heat Map Report</b> generating result for correct stream in in correct location
AIR-19518	<b>Camera Tree</b> and <b>Map</b> show correct states for ADAM device
AIR-19621	Jpeg image correctly corresponds with historical video stream in two-stream scenario
AIR-19795	Video Wall: Client connection maintained when creating 9 panel or larger multi-view
AIR-19832	Watchdog leaks resolved
AIR-19891	Symphony Client works consistently after deleting multiple camera tours
AIR-19893	Symphony Client works consistently after canceling add action for duplicate camera
AIR-19911	Changing services account username with <b>Symphony Manage Services</b> dialog box correctly updating username
AIR-19927	Importing CSV accepted with ports over 32767
AIR-19930	Symphony Client works consistently when controlling PTZ camera with PTZ Control panel
AIR-19932	Joystick functioning properly when cameras set to direct connect
AIR-19934	Client DevicePack Update process – Clarification added to KB article: <a href="https://www.aimetis.com/Xnet/KB/KBArticleView.aspx?ID=10166">https://www.aimetis.com/Xnet/KB/KBArticleView.aspx?ID=10166</a> <b>If an alert message indicating that a DevicePack with an older version number than the one already installed on the Client appears:</b> If you have Clients that connect to multiple servers, you should manage your DevicePack updates carefully because a server with an older DevicePack might want to update a Client that has a newer DevicePack. This exists only for the purpose of intentional downgrades.
AIR-19940	Client no longer continuously connects/disconnects under certain circumstances. See KB article: <a href="https://www.aimetis.com/Xnet/KB/KBArticleView.aspx?ID=10251">https://www.aimetis.com/Xnet/KB/KBArticleView.aspx?ID=10251</a>
AIR-19947	PTZ lock working correctly in direct mode
AIR-19952	<b>Discover Devices</b> no longer results in server disconnect
AIR-19961	Images.zip no longer part of backup.zip files
AIR-19991	Permissions consistent when switching from Symphony authentication to Active Directory
AIR-20010	Camera Tree updated correctly on all clients
AIR-20011	PTZ lock functions working correctly
AIR-20013	PTZ indefinite lock working correctly
AIR-20014	Video Wall layouts sorted correctly in alphabetical order

Fixed	
<b>AIR-20015</b>	Timeline in Symphony Web Client rendering correctly
<b>AIR-20016</b>	Server Registration working correctly with SSO
<b>AIR-20017</b>	<b>Users Viewing Cameras</b> dialog box shows correct user list
<b>AIR-20018</b>	Informative and instructional error message now provided to user whose security profile has changed while attempting to add devices in the <b>Camera Tree</b> dialog box: "The action cannot be performed because the security or device model has changed. Please re-open the window to load the latest model, and try again."
<b>AIR-20020</b>	Symphony correctly saving changed <b>Polling Frequency</b> in <b>CPU Overload Protection</b> of Server Farm
<b>AIR-20022</b>	<b>Device Tree Configuration</b> dialog box functioning correctly
<b>AIR-20023</b>	Alarm image correctly loaded when clicking on new alarm in <b>Alarm Log</b>
<b>AIR-20024</b>	<b>View Detailed Events</b> dialog box correctly displaying ALL events after user has clicked Yes to load more events
<b>AIR-20025</b>	Symphony client functions correctly when user switches quickly between <b>Add Another Tour</b> button and other buttons
<b>AIR-20047</b>	Device name change registered in <b>Camera Tree</b> within expected time
<b>AIR-20048</b>	Video wall functioning correctly when switching panels
<b>AIR-20079</b>	CSV imported camera list working correctly with redundant storage settings
<b>AIR-20087</b>	Thailand plates supported in Aimetis License Plate Recognition (ALPR)
<b>AIR-20090</b>	Alarm Log in Advanced mode context-menu option allows you to view the Alarm in the Main Camera View 
<b>AIR-20099</b>	MJPEG cameras showing correct colors in images
<b>AIR-20141</b>	Security permission of Deny PTZ Control correctly displaying permission warnings
<b>AIR-20147</b>	UPnP does not log errors. See KB article <a href="http://www.aimetis.com/Xnet/KB/KBArticleDetails.aspx?ID=10147">http://www.aimetis.com/Xnet/KB/KBArticleDetails.aspx?ID=10147</a> <b>Note:</b> Windows Server 2003 does not support UPnP.
<b>AIR-20165</b>	Images sent to File or Clipboard have correct colors
<b>AIR-20173</b>	Offline and online backup successfully created

# Release 6.12.1

Contains Device Pack 1.0.8.2 and Brazilian Portuguese Help

## New

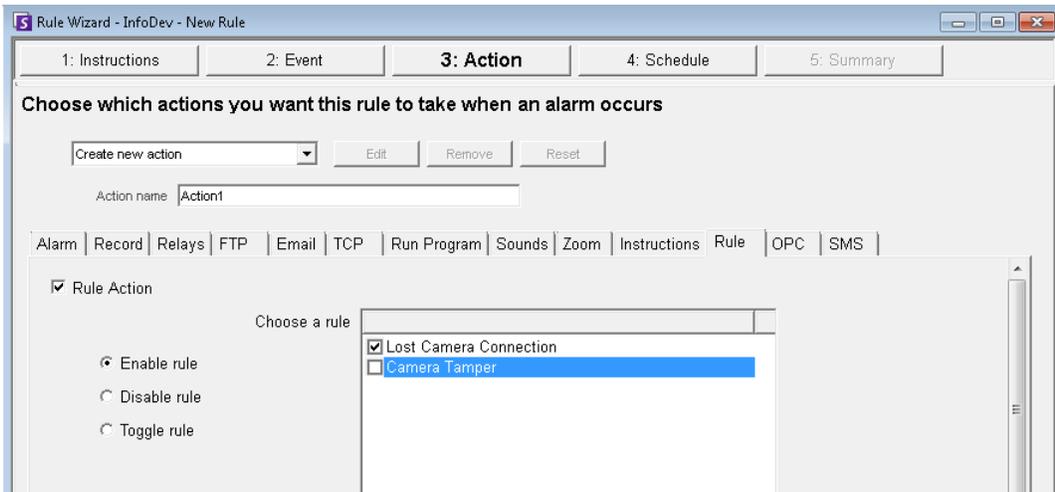

New	
<b>AIR-19544</b>	Automatic upgrade feature for Symphony Client Now includes Symphony Client upgrades in addition to Device Packs See also KB Article: <a href="#">How to change download scheduling and speed for Device Pack and Symphony Client updates</a>
<b>AIR-18646</b>	360 cameras can be exported as de-warped view

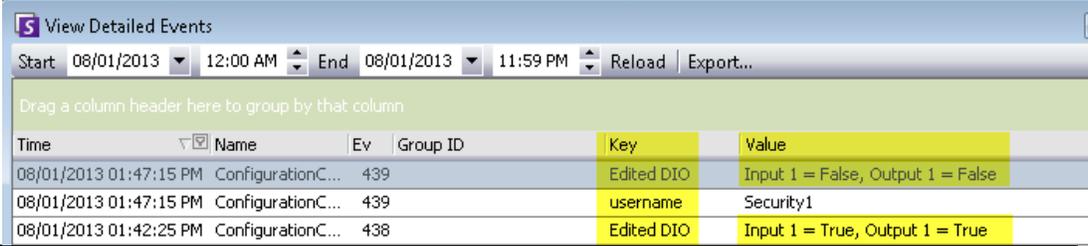

## Improvements

Improvements	
<b>AIR-18834</b>	Symphony now displays a message that not all ACTi camera resolutions are full field of view
<b>AIR-18835</b>	Symphony displays a warning message “Please refer to the device documentation for valid multi-stream configurations” on <b>Network</b> tab ( <b>Device</b> settings) for cameras with restrictions on valid resolution/codec/frame rate combinations
<b>AIR-19109</b>	Support for PT091 running on multi-core to avoid running out of CPU on a single core
<b>AIR-19170</b>	Support for integrating 3 <sup>rd</sup> party analytics into <a href="#">Symphony through the SDK</a>
<b>AIR-19195</b>	Symphony displays more than 120 days of footage on calendar
<b>AIR-19208</b>	Improved performance from decreased CPU load on database
<b>AIR-19217</b>	Reduced CPU load due to camera storage download requests
<b>AIR-19265</b>	Grid spacing in VE130 analytic changed to improve motion detection
<b>AIR-19289</b>	Sony: Symphony can now auto-discover Sony devices ( <b>Server Configuration&gt;New&gt;Discover Devices</b> button)
<b>AIR-19358</b>	Overload protection message now indicates which server has high CPU load
<b>AIR-19460</b>	Support for floating-point FPS in Device Settings

## Fixed

Fixed	
<b>AIR-13012</b>	Unhandled exception issue upon Rule creation resolved
<b>AIR-14400</b>	Unhandled exception issue on ThreadPool resolved
<b>AIR-15169</b>	Unhandled exception issue after modifying log level in <b>Manual Configuration</b> editor resolved

Fixed	
<b>AIR-18772</b>	<p>Vivotek de-warp issues resolved:</p> <ul style="list-style-type: none"> <li>Buttons displayed correctly when generating a report</li> <li>Heat map with wrong tracking paths - if you change the camera resolution and see this issue, select a more recent image (with the camera resolution)</li> <li>3D person icons displayed correctly when increasing FOV to 180 degrees in VE180 analytic configuration</li> </ul>
<b>AIR-18950</b>	<p>Rule <b>Action</b>, <b>Rule</b> tab modified: Rule list now as check boxes and “Restore state after motion ends” check box removed</p> 
<b>AIR-18992</b>	Correct camera list displayed in <b>Actions</b> screen of <b>Rule Wizard</b>
<b>AIR-19014</b>	User informed whether license old or expired when refreshing license from Aimetis.com
<b>AIR-19093</b>	Old footage deleted correctly with <b>Server&gt;Delete Old Footage</b> function
<b>AIR-19116</b>	Connected subevents in Rules triggering alarms successfully
<b>AIR-19117</b>	Hikvision: 6104 video server playback speed working in entire range correctly
<b>AIR-19136</b>	FTP Action in Rule Wizard correctly sends all JPEG images to FTP server
<b>AIR-19177</b>	License message correctly displayed in language setting of Symphony and OS
<b>AIR-19178</b>	Event Logs contain user information when deleting a camera
<b>AIR-19190</b>	All devices correctly displayed after restored online backup used after reimaged VM and reinstalled Symphony
<b>AIR-19202</b>	Counting line displayed correctly after upgrade
<b>AIR-19210</b>	Tracker synchronization process working correctly
<b>AIR-19270</b>	VE352 recording on motion correctly. Also, VE352 now contains <b>Tracked Motion Detected by PC</b> option in <b>Video</b> tab, <b>Record Video</b> dropdown list.
<b>AIR-19292</b>	Videowall: Resolved cross-thread exception error message when opening videowall through second Symphony client
<b>AIR-19297</b>	Symphony functioning correctly when registering new video wall client in video wall designer
<b>AIR-19310</b>	SDK User Guide updated:

<b>AIR-19488</b>	Smooth video playback from Panasonic cameras with lower CPU usage																								

Fixed	
<b>AIR-19489</b>	JPEGS: Correct video image produced without artifacts of video data from another time segment
<b>AIR-19522</b>	Validation check for potential URL redirection attack on port 50000 ensures users not redirected to wrong website
<b>AIR-19547</b>	Symphony correctly listing which servers failed
<b>AIR-19556</b> and <b>AIR-19557</b>	I/O states correctly updated in <b>Camera Tree</b>
<b>AIR-19686</b>	Client auto-update process successful
<b>AIR-19750</b>	User prompted to restart machine in case where Windows Desktop Experience installed during a fresh Symphony install on Windows Server 2008, 2008 R2, and 2012 (if not already installed on machine)
<b>AIR-19756</b>	Disk reaching full capacity issue resolved
<b>AIR-19764</b>	Alarm log in advanced mode successfully handles thousands of alarms
<b>AIR-19767</b>	Client functions successfully with multiple maps and multiple items added to maps
<b>AIR-19769</b>	Server license issues resolved

## Known Issue in 6.12.1

Server Farm	
<b>AIR-19886</b>	<p><b>Issue:</b> Adding a server to a farm in <b>Server Configuration</b> is temporarily non-functional.</p> <p><b>Workaround:</b> Use the <b>Setup Wizard</b>.</p> <p><b>Scope:</b> This only impacts users who want to create multi-server farms.</p>

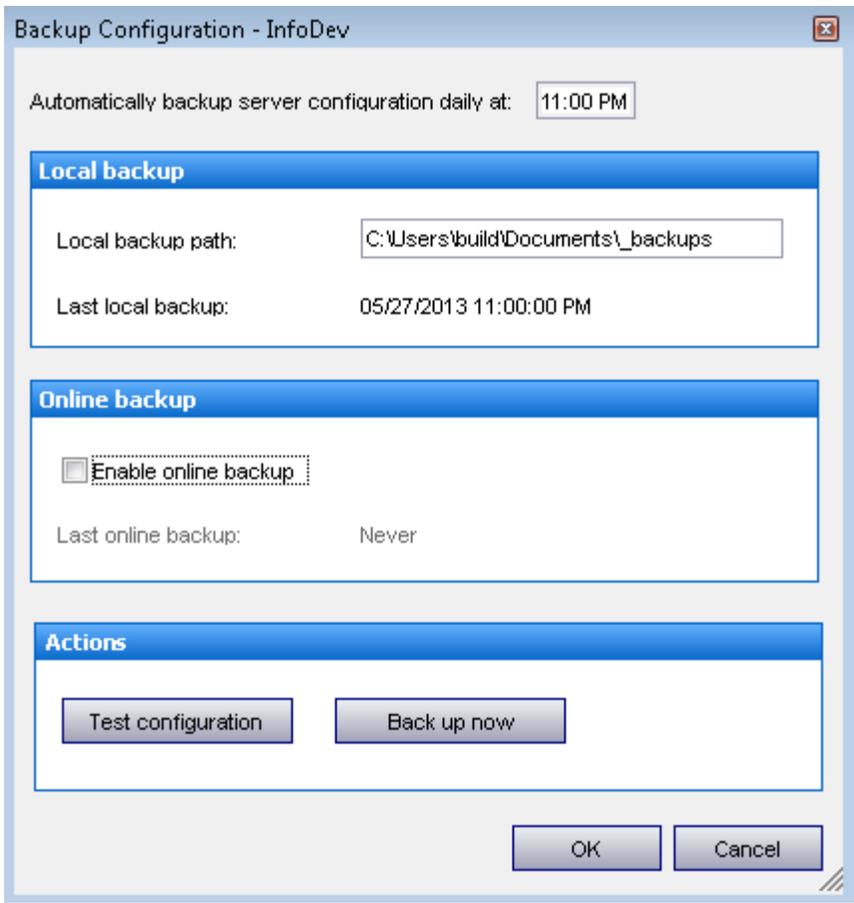

## Release 6.12.0.1

### Fixed

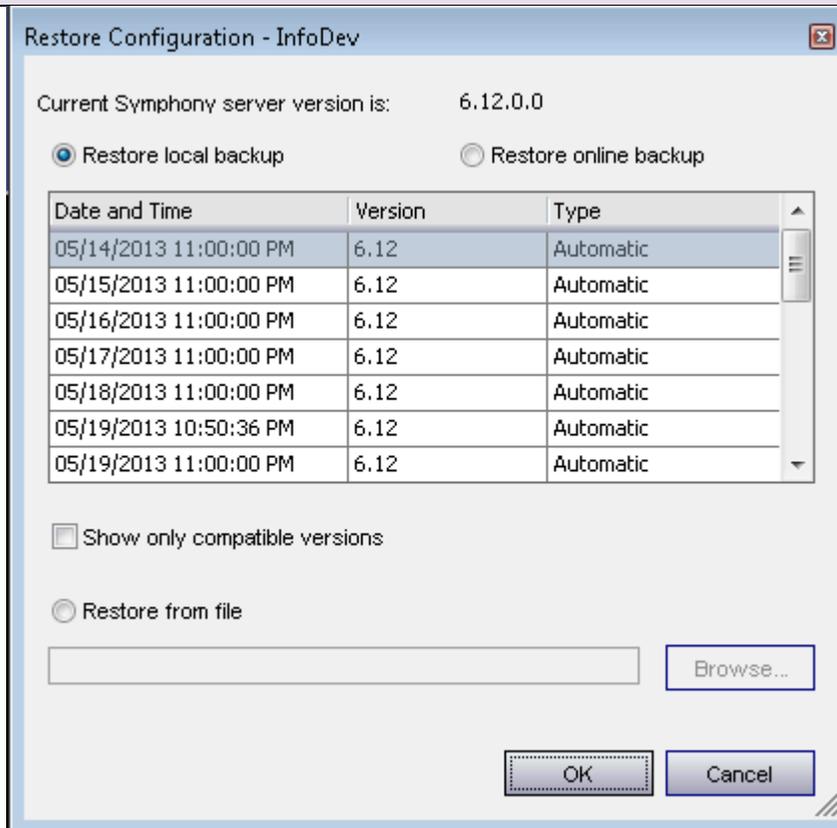

Fixed	
<b>AIR-19271</b>	Search functionality
<b>AIR-19273</b>	Redundant storage

# Release 6.12

## New

New	
<b>AIR-12959</b>	Support for Bosch Dinion camera I/O ports in <b>Maps</b> and <b>Device Tree</b>
<b>AIR-13920</b>	New simple and robust online and local backup and restore functionality – Full instructions in <a href="#">Symphony 6.12 Administration Guide</a> 

## New

Troubleshooting:

<https://www.aimetis.com/Xnet/KB/KBArticleView.aspx?ID=10212>

### AIR-15101

New camera movement compensation VE101 engine (BETA Release). No configuration required. Enterprise license required. To be used with VE150 or VE180.

For an outdoor surveillance camera that is moderately shaken (such as when attached to a pole on a windy day).

- VE101 incurs a large CPU penalty. To reduce CPU and storage utilization, no output of the stabilized video feed will be available – stabilization is run “live” in memory - frames are passed to the other analytics and then discarded.
- The other video engines (VE150 or VE180) will run with delayed video (obtained from the video stabilization output), even if the live view is in real-time. Therefore, the tracking boxes will appear delayed about 1.5 to 2 seconds. The video engine’s boxes around moving objects are stabilized, but the rendered video itself is not. Therefore the boxes may not line up exactly with moving objects.
- We always recommend fixing the core issue, if possible, by physically attaching the camera to something stationary under all weather conditions.

## New

**AIR-18133**  
and  
**AIR-18518**

Read/write to multiple storage locations, failover recording – **Availability** section in **Server Configuration>Storage**

The screenshot shows the 'Server Configuration - InfoDev2 - Storage' window. The left sidebar contains a tree view with categories: Rules, Devices (1) Camera1, (4) Camera2, (5) Camera3, (6) Camera4, (7) Camera5, (D2) HardwareDevice1, (D3) HardwareDevice2, Licenses, Notifications, General Settings, Storage (10.234.5.31), Server Farm, Client Connectivity, and Carousels. The main area is divided into three sections:

- Disk Usage Limits:** Contains text explaining that old footage will be removed to make room for new footage. It includes input fields for 'Minimum Disk Space' (5000 MB) and 'Minimum Disk Space Percentage' (8).
- Availability:** Contains text asking for a semicolon delimited list of paths. It has two radio buttons: 'Failover. Write to one storage path.' (selected) and 'Redundant. Write to all storage paths.'
- Footage Storage:** Contains checkboxes for 'Limit the number of days video is stored' (with a default of 7 days) and 'Keep metadata longer' (with a default of 7 days). It also has a 'Default path' field set to 'C:\Users\build\Documents\'. Below this is a table with columns 'Camera Id', 'Camera Name', and 'Storage Path'.

Camera Id	Camera Name	Storage Path
6	Camera4	
4	Camera2	
7	Camera5	
5	Camera3	
1	Camera1	

## Improvements

### Improvements

**AIR-11947**

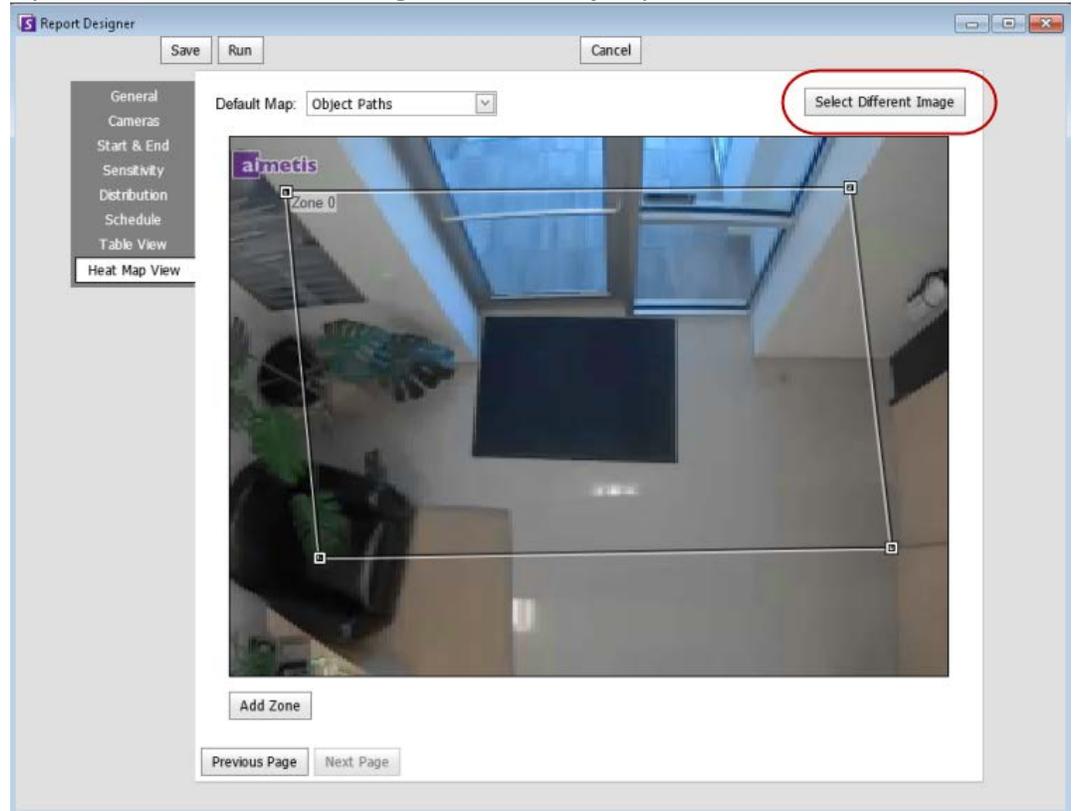

Users can modify **Analysis Resolution** in VE130

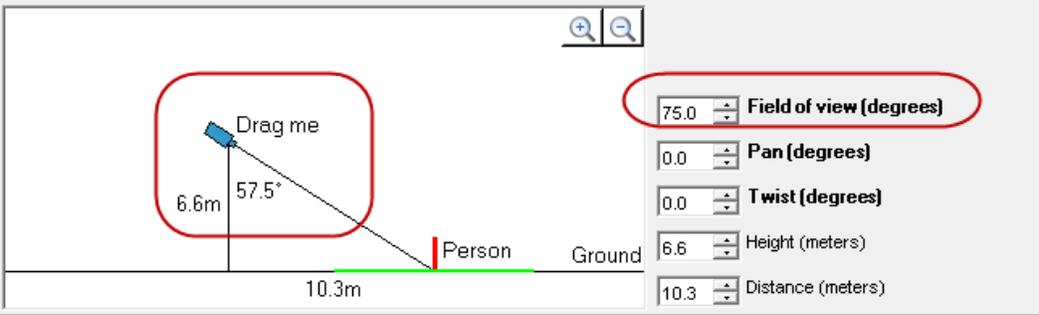

The screenshot shows the 'Server Configuration - InfoDev2 - Device' window. The left sidebar is the same as in the previous image. The main area is the 'Analytics Configuration' tab for the 'Intel\_VE130' device. It includes a 'Server' dropdown, 'Network', 'Video', 'Digital I/O', 'Analytics Engines', and 'Analytics Configuration' tabs. The 'Analytics Engines' dropdown is set to 'Intel\_VE130'. There are buttons for 'Restore Defaults', 'Select different i', and 'Show XML View'. The 'Analysis FPS' is set to 1. The 'Capture Resolution' is 320 x 240. The 'Analysis Resolution' dropdown menu is open and highlighted with a red circle, showing options: 640 x 480 (selected), 160 x 120, 320 x 240, and 640 x 480. Other settings include 'Minimum foreground fill (percent)' at 50.0, 'Grid spacing' with 'Rows' at 10 and 'Columns' at 13, and a 'Foreground sensitivity' slider. A checkbox 'Adjust sensitivity based on camera noise' is checked.

## Improvements

**AIR-13555**

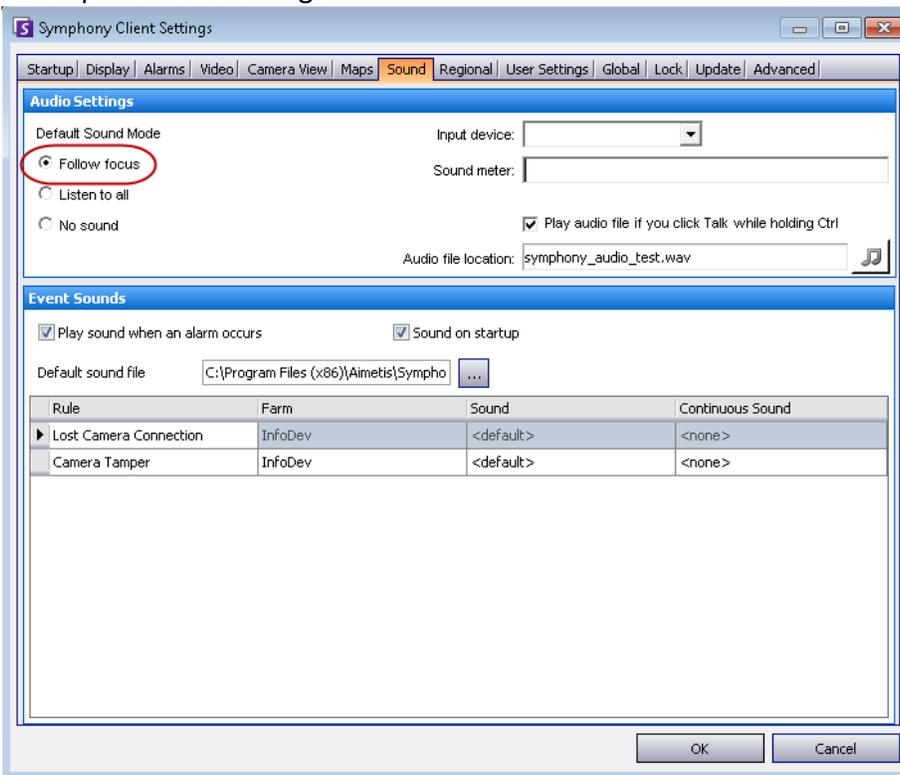

Option to select different image for **Heat Map** report added

Improvements	
<b>AIR-16417</b>	<p><b>VE180: Mouse wheel perspective control</b></p> <p>Allows you to control the amount of perspective in the scene without changing the overall scale. (Allows you to make a person icon a certain size while changing the <b>Field of view</b> so that the tilt of the other people icons and their relative size is correct.)</p> <p>Position the mouse over the little diagram. Rotate the mouse wheel to increase or decrease the <b>Field of view</b> in 2.5 degrees increments, creating an opposite proportional change in the ground distance parameter.</p> 
<b>AIR-18699</b>	<p>Example: Ground distance is 10.0 meters and the <b>Field of view</b> is 60 degrees. One mouse wheel click changes <b>Field of view</b> to 62.5 degrees and ground distance to <math>(60/62.5)*10.0 = 9.6</math> m. A mouse wheel click in the other direction changes <b>Field of view</b> to 57.5 degrees and ground distance to <math>(60/57.5)*10.0 = 10.43</math> m.</p>
<b>AIR-18699</b>	<p>Aimetis Physical Security Appliances (PSA): Customer warned when upgrading a PSA manually potentially to a release that has not been certified for the PSA</p>
<b>AIR-18831</b>	<p>Support for viewing video and PTZ control from IP cameras connected to JCI DVN5000 NVR</p>
<b>AIR-18976</b>	<p>Support for HikVision cameras in direct connect mode</p>

## Improvements

**AIR-18981** New **Follow focus** option in **Sound** tab of **Client Settings**. Keeps sound setting when panel focus changed.

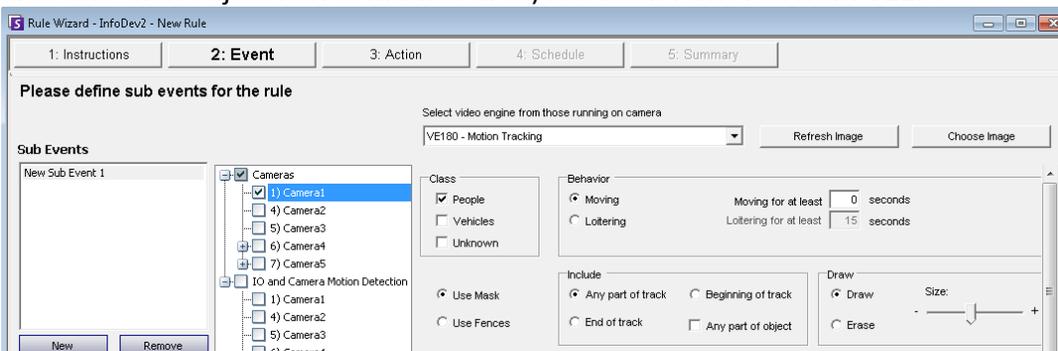

**AIR-19065** JCVS-IP2352422, JCVS-IP3352445, JCVS-IP141132336, and JCVS-IP1012211 cameras (supported as of Device Pack 1.0.6.1) are now auto-discovered with Symphony 6.12.

## Fixed

### Fixed

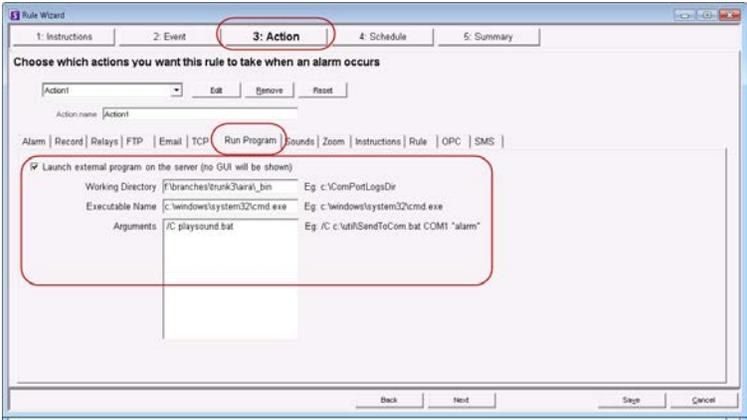

**AIR-11595** **Leaving** rule option (rule to trigger when an object is detected within a masked area and then object leaves masked area) has been removed from VE180

**AIR-14449** OpenCL support has been removed since Microsoft does not let services interact with the GPU

Fixed	
<b>AIR-16465</b>	ALPR: Changing date correctly updates License Plate log
<b>AIR-18176</b>	Resolutions from 2 <sup>nd</sup> stream in resolution range supported by the video analytic engine
<b>AIR-18275</b>	Video export from Client working correctly when server and client in different time zones
<b>AIR-18520</b>	Can successfully add server to farm
<b>AIR-18534</b>	Adding camera does <b>not</b> require Client restart after IP address of server changed
<b>AIR-18551</b>	PTZ camera correctly returns to Home position after unlocked by user
<b>AIR-18659</b>	Failover on multi-server farm: showing correct number of cameras on servers and correct number of redundant servers
<b>AIR-18678</b> and <b>AIR-18680</b>	Importing large number of cameras successful
<b>AIR-18683</b>	Client on one machine accurately updated when changes made to same client running on another machine
<b>AIR-18686</b>	<b>Quick Camera Setup</b> dialog box from <b>Camera Tree</b> context menu appears only if user has Device-Change Settings permissions. <b>Camera Setup</b> context menu visible in <b>Camera Tree</b> only if user has Farm-Change Settings permissions.
<b>AIR-18704</b>	Rule icon color on <b>Maps</b> can be changed successfully
<b>AIR-18742</b>	Videowall generates error messages as expected when user tries to change a panel with an incorrect panel name or when the Client is not running
<b>AIR-18766</b>	<b>Pre Event</b> and <b>Post Event</b> fields for 2 <sup>nd</sup> stream now contain default value of 15
<b>AIR-18870</b>	<b>Heat map</b> report generated correctly
<b>AIR-18922</b>	ONCAM: PTZ mouse control working reliably
<b>AIR-18923</b>	Alarm Statistics report generated successfully with cameras from different servers
<b>AIR-18942</b>	Hikvision: DS-6500/DS6516 encoders correctly auto-detected by Symphony
<b>AIR-18946</b>	<b>Rule Wizard – Sub events must occur</b> option: rule alarming correctly on sub event
<b>AIR-18962</b>	<b>General Settings</b> interface clarification – <b>Frame Time Deviation</b> now correctly reads as <b>Frame Rate Variance</b> . See also <a href="https://www.aimetis.com/Xnet/KB/KBArticleDetails.aspx?ID=10219">https://www.aimetis.com/Xnet/KB/KBArticleDetails.aspx?ID=10219</a>
<b>AIR-19000</b>	SNMP walk command successful when setting SNMP Retries to 2. Instruction added to Administration guide: SNMP using UDP, set <b>SNMP Retries</b> to 2. (Using iReasoning MIB browser, for example, <b>Tools&gt;Options&gt;General tab, SNMP Retries=2</b> field.)

## Known Issues

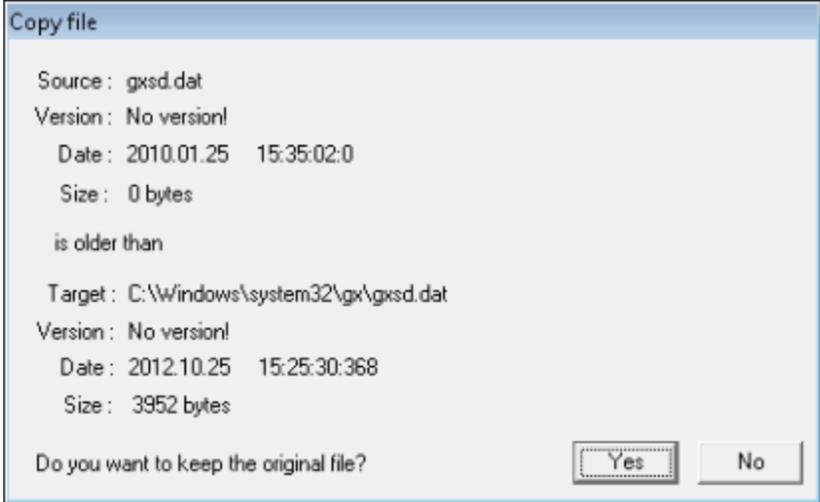

Sound		
AIR-16867	Release 6.9.5, 6.10	<p><b>Playing audio files via Rules does not work when using Server 2008 R2/Windows 7/Windows Vista</b></p> <p><b>Workaround:</b></p> <ol style="list-style-type: none"><li>1. Download “psexec” online (<a href="http://technet.microsoft.com/en-us/sysinternals/bb897553.aspx">http://technet.microsoft.com/en-us/sysinternals/bb897553.aspx</a>)</li><li>2. Setup <b>AI Scheduler</b> service to login as a user that has previously logged into the server interactively.</li><li>3. Setup the computer to automatically log in on bootup as the same user that is logging in <b>AI Scheduler</b>.</li><li>4. Create a <b>playsound.bat</b> batch file (<b>all one line</b>):</li></ol> <p>Example</p> <pre><b>psexec.exe -i 1</b> C:\Program Files (x86)\Aimetis\Symphony\_bin\schedulerplayer.exe play 1 0 c:\windows\media\chimes.wav</pre> <p><b>psexec.exe -i &lt;session to run program in&gt; &lt;path to schedulerplayer.exe&gt; play &lt;number of times to play&gt; &lt;delay&gt; &lt;path to audio file to play&gt;</b></p> <ol style="list-style-type: none"><li>5. The key “-i 1” must specify the interactive session number for the process to run in.<ol style="list-style-type: none"><li>a. To get a session number, run <b>procxp.exe</b> and turn on the session# column.</li><li>b. Look at the session number for a process running as the logged in user. This is probably always 1 on a Windows installation with a logged in session; therefore “-i 1” should always work.</li></ol></li><li>6. Create a rule action similar to the following:</li></ol> 

Cardax Integration		
AIR-16857 Renumbered as PACK-254	Release 6.10	<p><b>User must repair OPC Bridge Configuration Version 6 from Cardax after Symphony upgrade</b></p> <p>Installing OPC Bridge Component 6.1.0.5 and the OPC Core Components Redistributable software pieces are required for Cardax Access Control. The OPC Bridge Component stops working after a Symphony server upgrade.</p> <p><b>Workaround:</b></p> <p>If you have OPC Bridge Configuration Version 6 from Cardax installed you must repair it after upgrading Symphony by re-running the OPC Bridge Configuration installer.</p>

Camera		
AIR-12315 Renumbered as PACK-254	Release 6.5	<p><del>Support latest Mobotix Firmware for VMD of camera</del></p> <p>VMD from Mobotix cameras is working only on devices running Fw. 3.4.09 (from 2008). With the Fw. 3.5 and 4.x (running on all new models like M24, D24, Q24) it is not possible to use this functionality.</p> <p><b>Renumbered as PACK-254</b></p> <p><b>See DevicePack Release Notes 1.0.6.0</b></p>
AIR-12896	Release 6.6	<p><b>When adding Axis 241Q, only the first channel has default codec set Camera</b></p> <p>When adding Axis 241Q and other multi-channel video servers, such as Hikvision 6104), and clicking the <b>Connect to Camera</b> button, only the first channel has the default codec settings. All others channels have a blank codec.</p> <p><b>Will not fix.</b></p>
AIR-15613	Release 6.9	<p><b>Multi-lens cameras require one license</b></p> <p>If you select a multi-lens camera, multiple licenses will be required. You must contact Sales to be given the difference of licenses, for free. This problem is typically only with Arecont cameras.</p>

Interface		
AIR-12409 Renumbered as PACK-175	Release 6.5	<p><b>Vivotek FD8361 crops image in stream 2 and displays stream 1 when navigating away from camera</b></p>

Documentation		
AIR-19192	Release 6.12	<p>6.12 HELP missing some VE180 interface changes. However, information is up to date and correct in the <a href="#">Aimetis Symphony 6.12 Analytics Guide</a>.</p> <p>Resolved: 6.12.1 HELP updated</p>

LPR		
<b>AIR-17540</b>	<b>Release 6.10.1</b>	<p>When LPR installer prompts user with message regarding gxsd.dat file, user should select <b>No</b>.</p>
		 <p><b>Copy file</b></p> <p>Source : gxsd.dat  Version : No version!
